City of Imperial
420 S Imperial Ave.
Imperial, Ca 92251

Dear City of Imperial:

We are interested in City of Imperial's services and would like to receive city services on our property. We understand that there will be costs and will be responsible for these.

We currently have canal water and use a water pump, we have had to deal with the failing of the water pump and costly repairs and even replacing it over the years.

When there is rain and wind our water has a foul odor, it's dirty and stains our clothes when doing laundry, we need to wash dishes using filtered water. This situation usually will last 2 to 3 weeks.

We need to have a water delivery system to drink, cook and wash our fruits and vegetables because canal water does not meet these standards causing us an extra expense.

Your consideration on this request is greatly appreciated.

Sincerely,

Martin Pena

Teresa Pena
