

# Staff Report

Agenda Item No. F-1

**To:** City of Imperial Traffic Commission  
**From:** Lisa Tylenda, Planner  
**Date:** November 7, 2019  
**Subject:** Proposed placement of new Stop Signs @ intersection of Cedro Avenue & De Paoli Street; Imperial, CA 92251.

---

## Background

City Council directed staff review the possible placement of Stop Signs in the area of Cedro Avenue and De Paoli Street in efforts to increase safety and reduce speeding in the area. The item has been reviewed by the Development Review Committee (DRC). After reviewing the direction given by council, staff found that it would be suited for the area, to add Stop Signs at the intersection of De Paoli Street and Madrone Circle creating a three-way Stop. Cedro Avenue and De Paoli are off center and would not be an area suited for a three-way stop.

Placing new stops signs at the east, west, and north intersections of Madrone Circle and De Paoli Street, not only would meet the vision of safety on the council’s behalf, but could potentially meet and influence some of the goals within our Land Use and Circulation Element:

- **Circulation Element Goal #1 Circulation & Land Use :** Plan land uses in conjunction with the circulation system to encourage future growth in areas of higher density on transportation nodes, which will better allocate City resources and limit vehicle miles traveled.

**Circulation Element Goal #2 Safe & Complete Streets :** Develop a multi-modal network and balanced transportation system that safely accommodates all modes of travel.

- **Circulation Element Goal #3 Circulation Efficiency:** Provide for safe and efficient movement for all modes of transportation throughout the City.
- **Circulation Element Goal #4 System Sustainability:** Attain a sustainable transportation system that can be built, operated, and maintained, within the City’s existing and future resources.

**Staff Recommendation:**

Staff recommends this item to the Traffic Commission for discussion and action.
